Anyone can test positive for practically anything with a PCR test, if you run it long enough...with PCR if you do it well, you can find almost anything in anybody...it doesn't tell you that you're sick."
—Dr. Kary Mullis, PhD, creator of the PCR test.

90% Inaccurate: Bombshell German Study Exposes the PCR Test Fraud That Locked Down the World

A seismic new study out of Germany has just dropped a truth bomb on the entire COVID-19 narrative, and the implications are staggering.

Remember the PCR tests? The ones that decided if you were locked down, forced into a quarantine hotel, or stripped of your freedoms? They were the cornerstone of the global pandemic response.

Now, a major analysis of Germany's lab data—representing 90% of all tests—has conducted a simple, devastating check. They compared PCR "positive" results with actual blood tests for IgG antibodies to see who was truly infected.

The finding is jaw-dropping:

Only 10-14% of people who tested positive on a PCR test actually had antibodies proving a real infection.

That means the tests were up to 90% INACCURATE. For every 10 "cases" reported, only 1 was likely real.

This confirms what many warned about in 2020: inflated cycle thresholds (Ct) were creating a pandemic of false positives. A separate paper at the time stated that at 35 cycles, the false positive rate was 97%.

They had the antibody data all along. They could have calibrated the tests and stopped the fear cycle. Instead, they chose to run millions of flawed tests, terrorizing the population with case numbers they knew were scientifically meaningless.

Guys like Fauci get up there and start talking. He doesn't know anything about anything and I'd say that to his face.
NOTHING!
The man thinks you can take a blood sample and stick it under an electron microscope and if it's got a virus in there you'll know it. He doesn't understand electron microns and he doesn't understand medicine and he should not be in a position like he's in. Most of those guys at the top are just administrative people and they don't know anything about what's going on at the bottom. Those guys have got an agenda, which is not what we would like them to have, being that we pay them to take care of our health in some way. They've got their own personal kind of agenda. They make up the rules as they go. They change them when they want to.
Tony Fauci does not mind going up on television in front of the people that pay his salary and lie directly into the camera.
— Kary Mullis, PhD. Nobel Prize winning scientist and inventor of the PCR test.

Think of the consequences:
✅ Lockdowns based on false data.
✅ School closures over phantom cases.
✅ Vaccine mandates for a threat that was wildly overstated.

And the ultimate irony? The one place you were guaranteed not to get a PCR test was in the COVID-19 vaccine clinical trials. They never tested participants to see if the vaccine actually stopped infection or transmission.

The "science" we were told to "trust" wasn't just wrong—it was a catastrophic failure that collapsed the world economy and stripped us of our civil liberties.

This isn't just a revelation. It's an indictment.

Belyi says:

Ages before 'covid', I'd researched Gary Mullis and the PCR test because I like detective documentaries and the test featured in several of them. It had solved many cold cases as it was the only one that could work with tiny scraps of DNA. Mullis was a very interesting speaker too and his poor opinion of Fauchi went far further back than 'covid'.

He died of an unexpected heart attack towards the end of 2019. Well what a surprise!
